

## Press Release\_ Miami Boat Show

# **NANOV announces its new 20.1” Waterproof Outdoor LCD TV - LCD TV for the Cockpit area of Yachts, swimming pool areas, bathrooms and back yard.**

Mississauga, Ontario – Feb 13, 2007

Nanov Display, Inc, a manufacturer and marketer of security and marine products announces its development of 20.1” waterproof outdoor LCD TVs – Model Number: NKLT201DGWP, the industry’s first immersable liquid crystal display television, as well as the 40” water resistant high brightness outdoor HDTV. The addition of new products is further evidence of the company’s commitment to provide innovative technology as a display supplier in the Security and Marine industries. NANOV’s quality products are designed and engineered to complement today’s advanced product development using an engineering team of boat builders and experienced TV manufacturers. Nanov Display products are made by South Korean TV manufacturers.

Major features of this product are:

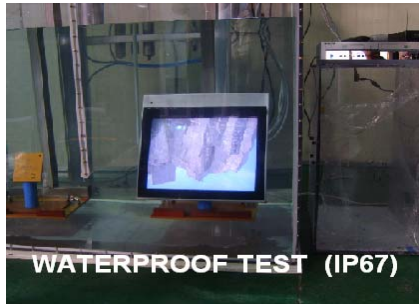

- High Brightness: 1000cd/m2 to view outdoor sunlight circumstance
- Aluminum Housing: Heat transfer and protection from salt corrosion
- Poly Carbonate glass: protection from scratching
- Waterproof: Vacuumed circuit boards
- Connectors: Rubber shielded connectors

The company also introduces its 40” water resistant outdoor HD LCDTV with a conformal coated circuit board for swimming pool areas and outdoor applications, Model number NKLT400WR, during the Miami International Boat Show from Feb 15 to Feb 19, 2007 at Miami Convention Center booth number 1847.

Nanov Display, Inc plans to market new products through its national distribution network -CWR electronics and boat builders, and currently recruiting distributors in US and Canada. The products are used in swimming pool areas at hotels, outdoor back yards at home and Oceanside shops, restaurants and bars in addition to cockpit areas on yachts.

NANOV's innovative and professional grade marine products are:

- a. 10.4", 20.1" and 23" Waterproof LCD TV
- b. 32" and 40" Water resistant LCD TV
- c. 15", 20.1" Marine LCD TV- 12V DC, 23" LCD TV – 24V DC
- d. Marine CCTV waterproof bullet cameras

Mr. Myung Kune Moon, Executive Vice President of Nanov Display, Inc. comments "We have made significant achievements in new product developments with Korean TV manufacturers for the Security and Marine industries. The company plans to expand the market in 2007 by diversifying its portfolio on products not only in the security industry but the marine industry as well. I am pleased with the introduction of innovative immersable LCD TVs which show exceptional performance, and I am confident that with the new addition of NANOV's high quality product line, the company positions itself as a major marine LCD TV and monitor provider in the Marine industry."

Nanov Display, Inc has been incorporated in Fredericton, New Brunswick and opened operation March, 2006 in Mississauga, Ontario, Canada. The company establishes USA operation on January, 2007 in Coral Gables, Florida. The NANOV marine products distribution centers are located in Los Angeles, California and Miami, Florida.
