

Jackson Memorial Hospital Project Summary

JHS, Jackson Memorial Hospital, Miami, Florida

March 2019

Project Summary

The Jackson Health System (JHS) is an integrated healthcare delivery system which provides medical services to residents of Miami-Dade County, Florida. Among its many various medical institutions, the Miami Jackson Memorial Hospital (MJMH) is the flagship hospital of the Jackson Health System. It is located within the Health District of Miami, Florida and is the largest hospital in the United States with 1,547 beds.

In 2018, MJMH commissioned NANO DISPLAY INC to manufacture and deploy four design-built, uniquely architectural, outdoor LCD digital sign kiosks for wayfinding purposes.

The specifications of the 75" digital sign structures include but are not limited to:

- 9 feet-high, four-sided, outdoor, 75" LCD signs arranged to form a kiosk
- Jackson Memorial Hospital branding above each LCD sign, with backlit LED "Information" signs translated into three languages - English, Spanish, and Creole
- Light aluminum roof for easy installation but with a fully protected structure encased by a powdered steel enclosure
- Bottom stainless-steel kick plate to protect the sign from strollers, flooding, animals, etc.
- Dynamic content design that provides hospital information, directions, news alerts, maps, etc. for both hospital and commercial settings
